

## Information Technology Services

*Add expert support to your business operations at a fraction of the cost versus full-time employees.*

- FACT:** Your business depends on computer systems and cannot afford hours lost on “downtime”.
- FACT:** New regulations expect access control, logging and encryption solutions for you *and* your business associates.
- FACT:** Security threats are everywhere: outside hackers, careless employees or malicious insider activity.

With information technology expertise covering more than two decades, Atris Technology delivers affordable IT Support solutions to regional businesses. Unlike completely outsourced vendors, Atris HelpDesk solutions can include local, onsite support and give you the ideal combination of expertise and personal service.

*Solutions for businesses requiring high availability and information technology security:*

### Atris CarePack

- Hosted E-mail services
- E-mail encryption and Data Loss Prevention
- Managed Firewall with Data Loss Prevention
- Managed Antivirus
- Managed Endpoint Security
- Managed Network with Monitoring
- Onsite Data Backup Management
- Weekly External Vulnerability Scans
- Security Information and Event Management

Rely on experts who combine emerging technology with proven solutions to drive your business efficiencies. Learn from our consultants who also understand complex regulatory challenges including HIPAA, PCI and GLBA.

Contact Atris Technology today - we look forward to discussing solutions available to your needs.
